

At ARB Teak, our “Grade A” teak requires very little maintenance. However, used directly in the shower, soap scum may accumulate on your teak bench or mat. Using a bristle brush, mild soap and water, scrub gently in the direction of the grain. Be sure to lift your mat and clean the bottom section as well. Rinse well with fresh water and allow the teak to dry in open air. Never use oil or other finishing products. If needed, sand the wood gently to remove stains.

No assembly required.
